

DROP FORGED EYE NUTS — T316 STAINLESS

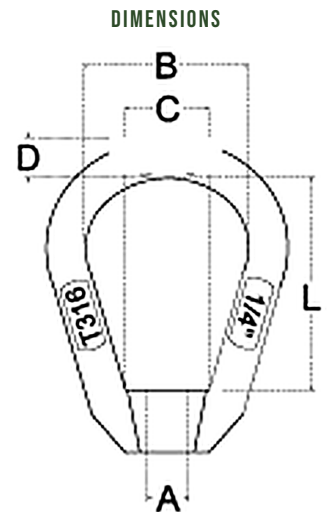

TYPE 316 STAINLESS · DROP FORGED · THREAD SIZES 1/4" TO 3/4" · WLL 460 TO 5,140 LBS.

Drop forged eye nuts thread onto a bolt or rod to provide a fixed lifting or tie-off point. Manufactured from type 316 stainless steel, they offer maximum corrosion resistance for marine, architectural and washdown environments where plated carbon steel would rust.

BENEFITS & FEATURES

- **Type 316 stainless steel** for maximum corrosion resistance
- Drop forged for strength and consistent grain structure
- Threaded eye nut provides a lifting or tie-off point on a threaded rod or bolt
- Non-magnetic and highly resistant to pitting in chloride environments
- Available in thread sizes 1/4" through 3/4"
- Working load limits from 460 to 5,140 lbs.

△ Eye nuts are designed for **in-line (axial) loading only**. Do not angular load. The nut must seat flush and square against the load-bearing surface, and threads must be fully engaged. Never exceed the rated working load limit.

SIZES, DIMENSIONS & WORKING LOAD LIMITS

THREAD SIZE A (IN.)	DIMENSIONS (IN.)				WORKING LOAD LIMIT (LBS.)	WEIGHT (LBS.)
	B	C	D	L		
1/4"	0.70"	0.58"	0.28"	1.05"	460	0.08
5/16"	0.70"	0.58"	0.28"	1.05"	780	0.08
3/8"	1.25"	1.00"	0.38"	1.50"	1,160	0.25
1/2"	1.25"	1.00"	0.38"	1.50"	2,150	0.25
5/8"	1.50"	1.20"	0.50"	2.00"	3,440	0.53
3/4"	1.75"	1.25"	0.62"	2.38"	5,140	0.95

Type 316 stainless steel, drop forged. Working load limits apply to a straight in-line pull with the nut fully threaded and seated square against the bearing surface. Reduce capacity for any angular loading. Imported.

APPLICATIONS

- Marine & dock hardware
- Architectural cable & railing
- Food processing & washdown areas
- Chemical & coastal structures
- Tie-off and anchor points
- General industrial rigging

ALSO AVAILABLE

- Forged eye bolts — shoulder and plain pattern
- T316 stainless turnbuckles & bodies
- Stainless shackles, thimbles & wire rope clips
- Threaded rod, nuts & washers in 304 and 316
- Custom thread sizes on request
