

OVERHAUL BALLS

SPLIT HEADACHE BALLS · TOP SWIVELING ASSEMBLIES · 20 TO 100 LB. SPLIT BALLS · 5 TO 35 TON ASSEMBLIES

OVERHAUL BALLS — SPLIT BALL

- **Adds weight to wire rope at any point** — a convenient way to overhaul the block on light hook loads
- Split halves bolt together for clamping directly on the rope
- Sizes for rope from 3/8" to 7/8"
- Overhaul weights of 20, 50 and 100 lbs.
- Cast iron with yellow enamel finish

Assembled view and split halves

MODEL NUMBER	ROPE SIZE	DIAMETER (IN.)	WEIGHT (LBS.)
HB20	3/8"	5	20
HB50	1/2", 5/8"	7	50
HB100	5/8", 3/4", 7/8"	9	100

OVERHAUL BALLS — Y-LINK® SWIVELING ASSEMBLIES

SOLID-BALL® TOP SWIVELING OVERHAUL BALL ASSEMBLIES

These highest-performance overhaul ball assemblies are uniquely equipped with angular contact ball bearing (ACBB) swivels for maximum response to wire rope dynamics under load. The ACBB swivel contains a set of multiple, precision-matched bearings which respond with significantly lower friction and torque than do the basic thrust bearing overhaul balls found elsewhere. In addition to the improved responsiveness, long term durability is greatly enhanced due to longer bearing life.

- Working load capacities from 5 to 35 tons
- Design safety factor of 5:1
- Weights to 1,450 lbs. for up to 1-1/2" rope
- Y-Link® ACBB swivel
- Swivel lubrication fitting
- Drop forged steel eye hook with safety latch
- Optional positive locking latch
- Heavier & bottom swiveling models available
- Integrated wedge socket or clevis fittings available
- Available in full conformance with API 2C

CONFORMANCE

Split ball dimensions and weights as shown above. Swiveling assemblies are built to order — specify rope diameter, required overhaul weight and end fitting. Heavier and bottom-swiveling models, integrated wedge socket or clevis fittings, and full API 2C conformance available on request.
