

7X19 GALVANIZED AIRCRAFT CABLE

GALVANIZED STEEL · FEDERAL SPECIFICATION RR-W-410 · TYPE VI, CLASS 3 · ASTM A1023

GALVANIZED

Zinc Coated Steel · Commercial Grade

7x19 construction galvanized aircraft cable provides good corrosion resistance and excellent flexibility at an economical price point. The 7x19 design (7 strands of 19 wires each) offers greater flexibility than 7x7 construction, making it ideal for applications requiring frequent bending.

Zinc galvanized coating per ASTM A1023 provides reliable corrosion protection for outdoor and general industrial environments.

Adheres to Federal Specification RR-W-410, Type VI, Class 3. Zinc coating weight conforms to ASTM A1023.

Warning: Wire rope & aircraft cable should never be used at breaking strength. A minimum 10:1 safety factor is recommended for critical applications.

SPECIFICATIONS & BREAKING STRENGTH

CABLE DIAMETER	CONSTRUCTION	MINIMUM BREAKING STRENGTH (LBS)	WEIGHT PER 1,000 FT (LBS)
3/32"	7x19 Galvanized	1,000	16.0
1/8"	7x19 Galvanized	2,000	29.0
5/32"	7x19 Galvanized	2,800	45.0
3/16"	7x19 Galvanized	4,200	65.0
7/32"	7x19 Galvanized	5,600	86.0
1/4"	7x19 Galvanized	7,000	110.0
9/32"	7x19 Galvanized	8,000	139.0
5/16"	7x19 Galvanized	9,800	173.0
3/8"	7x19 Galvanized	14,400	243.0

MBS = Minimum Breaking Strength. Commercial grade import. Material origin is import unless requested otherwise. Zinc coating conforms to ASTM A1023. MIL-Spec MIL-DTL-83420 and commercial grade available upon request.

FEATURES

- Galvanized zinc coating for reliable corrosion protection
- 7x19 construction for maximum flexibility
- Adheres to Federal Spec RR-W-410, Type VI, Class 3
- Ideal for general industrial, agricultural, and outdoor applications
- Available in diameters from 3/32" to 3/8"
- MIL-Spec and domestic grade available upon request

APPLICATIONS

- Marine rigging & sailing
- Architectural railing systems
- Stage & theater rigging
- Signage & display
- Industrial guying & bracing
